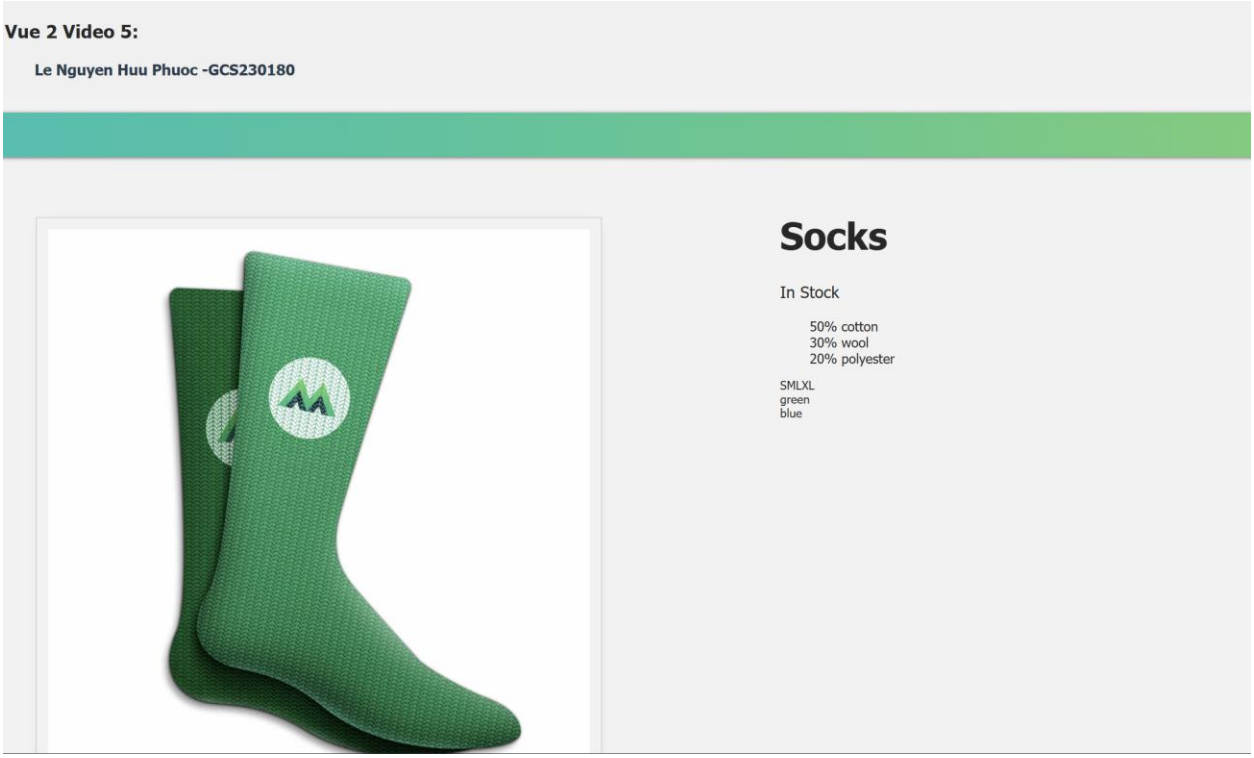
Vue – 02

Lesson 05



index.html

week4 > Vue 02 > video 5 > index.html > html > body > div#app > div.student-watermark > h3

```html
<html lang="en">
  <body>
  <div id="app">
    <div class="student-watermark">
  </div>
    <div class="nav-bar"></div>

    <div class="product-display">
      <div class="product-container">
        <div class="product-image">
          <img v-bind:src="image">
        </div>
        <div class="product-info">
          <h1>{{ product }}</h1>
          <p v-if="instock">In Stock</p>
          <p v-else>Out of Stock</p>
          <ul>
            <li v-for="detail in details">{{ detail }}</li>
          </ul>

          <div class="sizes">
            <span v-for="size in sizes">{{size}}</span>
          </div>

          <div v-for="variant in variants" :key="variant.id">{{variant.color}}</div>

        </div>
      </div>
    </div>
  </div>
</body>
<!-- Lê Nguyễn Hữu Phước -->
<!-- Video 5-->
```

index.html | main.js

week4 > Vue 02 > video 5 > main.js

```javascript
const app = Vue.createApp({
    data() {
        return {
            product: 'Socks',
            StudentName:['Le Nguyen Huu Phuoc -GCS230180'],
            image:`./assets/images/socks_green.jpg`,
            instock:true,
            details:['50% cotton','30% wool','20% polyester'],
            sizes:['S','M','L','XL'],
            variants:[
                {id: 2234, color: 'green', image:`./assets/images/socks_green.jpg`},
                {id: 2235, color: 'blue', image:`./assets/images/socks_blue.jpg`}
            ]

/*Lê Nguyễn Hữu Phước

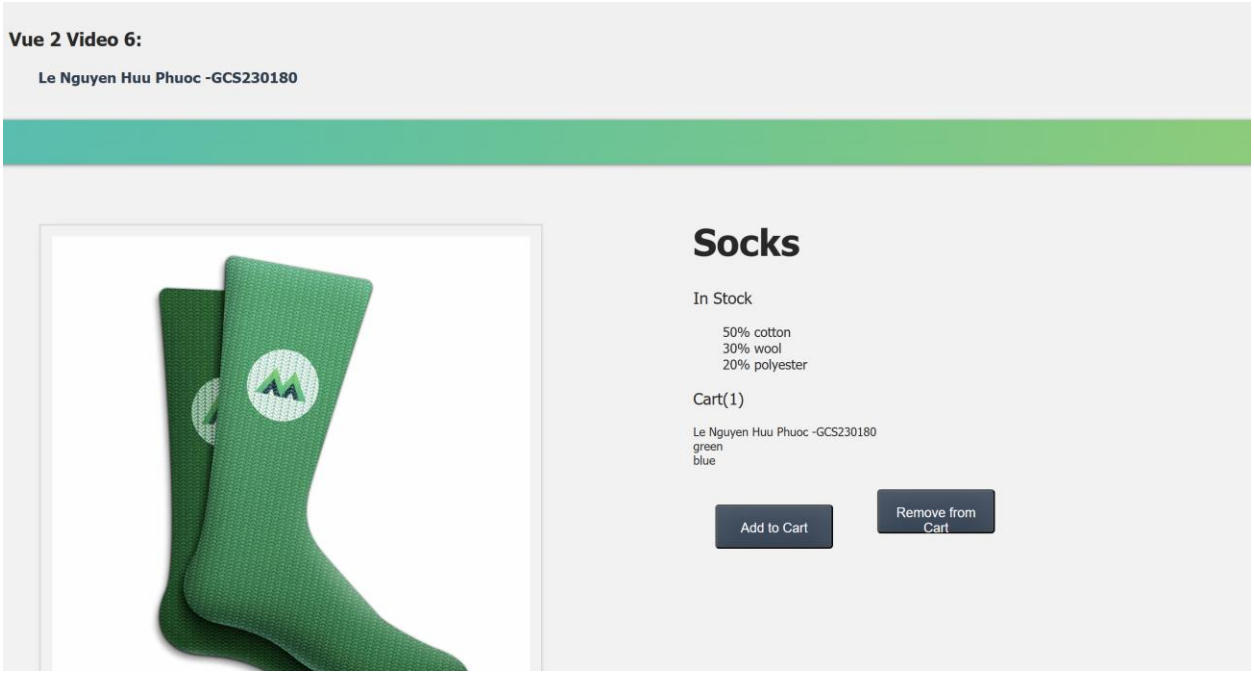
        }
        }
    })
```

Lesson 06



index.html main.js

week4 > Vue 02 > video 6 > index.html > html > body > div#app > div.product-display > div.product-container > div.product-info

```html
<html lang="en">
  <body>
  <div id="app">
    <div class="student-watermark">
    <ul>
    </ul>
  </div>
    <div class="nav-bar"></div>

    <div class="product-display">
      <div class="product-container">
        <div class="product-image">
          <img v-bind:src="image">
        </div>
        <div class="product-info">
          <h1>{{ product }}</h1>
          <p v-if="instock">In Stock</p>
          <p v-else>Out of Stock</p>
          <ul>
            <li v-for="detail in details">{{ detail }}</li>
          </ul>
<!-- Lê Nguyễn Hữu Phước -->
<!-- Video 6-->

          <p>Cart({{cart}})</p>
          <div>
            <span v-for="size in sizes" :key="size" class="size-box">{{size}}</span>
          </div>

          <div v-for="variant in variants" :key="variant.id" @mouseover="updateImage(variant.image)">{{vari
          <button class="button" @click="addToCart">Add to Cart</button>
          <button class="button" @click="cart -=1">Remove from Cart</button>

          </div>
```

index.html main.js

week4 > Vue 02 > video 6 > main.js

```js
const app = Vue.createApp({
    data() {
        return {
            cart:1,
            StudentName:['Le Nguyen Huu Phuoc -GCS230180'],
            product: 'Socks',
            image:`./assets/images/socks_green.jpg`,
            instock:true,
            details:['50% cotton','30% wool','20% polyester'],
            sizes:['Le Nguyen Huu Phuoc -GCS230180'],
            variants:[
                {id: 2234, color: 'green', image:`./assets/images/socks_green.jpg`},
                {id: 2235, color: 'blue', image:`./assets/images/socks_blue.jpg`}
            ],

        }
    },
        methods: {
            addToCart(){
                this.cart += 1},

            removeFromCart(){
                if( this.cart >0){
                this.cart -= 1
                }
            },

            updateImage(variantImage){
                this.image = variantImage
        /*Lê Nguyễn Hữu Phước

Understanding

As a student embarking on the Vue 3 journey through Vue Mastery, Lessons 5, 6, and 7 have been a significant turning point in my understanding of reactive frameworks.

Starting with Lesson 5 on List Rendering, I was struck by how elegantly the v-for directive handles data collections. In traditional JavaScript, rendering a list often involves cumbersome loops and manual DOM updates. In contrast, Vue makes it look effortless, emphasizing the importance of the :key attribute to ensure performance and maintain element identity. This lesson showed me how to turn raw data into organized UI elements with minimal code.

Lesson 6, which covers Event Handling, was equally enlightening. Using the @ shorthand to listen to DOM events like clicks or mouse movements felt incredibly intuitive. I particularly enjoyed how easily events connect user actions to the underlying data state, making the application feel alive and responsive. It made me realize that building user interactivity doesn't have to be a convoluted process.

Finally, Lesson 7 on Class and Style Binding tied everything together. The ability to dynamically change a component's appearance based on its state—such as highlighting a selected variant—is a fundamental skill for any front-end developer. Seeing Vue track these changes automatically through its reactivity system is truly impressive. Collectively, these lessons have boosted my confidence, making the transition from static pages to dynamic web applications feel both manageable and exciting.
